

Endocrine Symposium

Tuesday,
May 7, 2019
8:30 am – 3:30 pm

Provided By:
Baystate Division of Endocrinology,
Diabetes and Metabolism
Baystate Continuing Interprofessional Education

The Log Cabin and
Banquet Meeting House
500 Easthampton Road
Holyoke, MA 01040

Audience: This educational activity is designed for physicians, nurses, nurse practitioners, physician assistants and certified diabetes educators.

Goal: The goal of this educational activity is to support safe, effective, patient-focused care for the patients with endocrine disorders.

Learner Objectives

1. Develop rational treatment algorithms for the patient with type 2 diabetes and cardiovascular disease.
2. Identify the cardiovascular advantages and disadvantages to glucose lowering medications.
3. Review the key findings of recent cardiovascular outcomes trials involving glucose lowering medications.
4. Describe alternative thyroid therapies.
5. Review testosterone replacements in men and women.
6. Describe indications for bone density testing and for treatment in older men and women.
7. Describe some of the newer mechanisms of action and efficacy of newer medical therapies to treat osteoporosis.
8. Define the medical treatment options for pediatric morbid obesity.
9. Describe the current status of pediatric morbid obesity as well as its comorbidities.
10. Name the types of bariatric surgery done in adolescents along with outcomes with respect to physical and mental health and well-being.
11. Describe advantages and disadvantages of gastric bypass surgery.
12. Discuss eligibility criteria for insulin pump therapy.
13. Review different types of insulin pumps and continuous glucose monitors.
14. Review history of insulin pump therapy.
